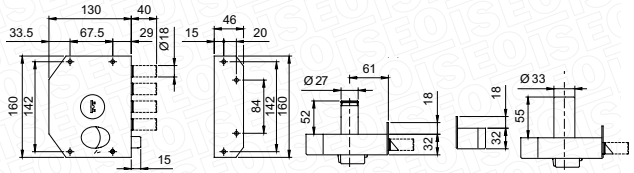
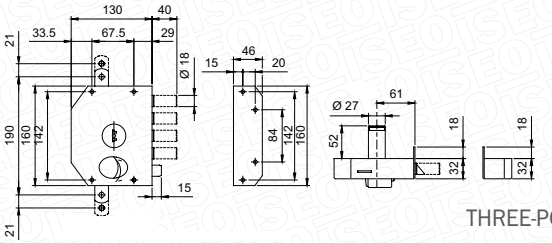
Perfecta

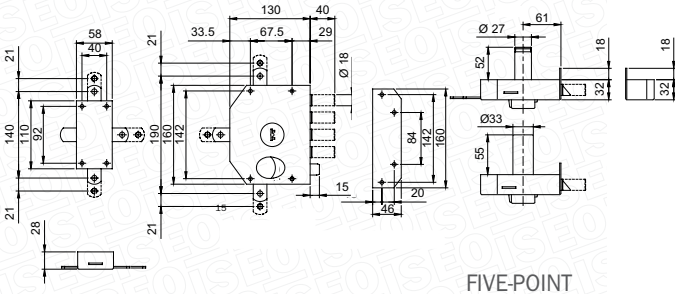
SECURITY RIM LOCK



LATERAL



THREE-POINT



FIVE-POINT

PRODUCT:

Featuring generously sized deadbolts and multiple latch points, the Perfecta rim lock - available as the 911, 913 and 915 series - may be used to increase the level of security of main entrance doors in wood.

OPERATING:

Latch retracted from external side with key and from internal side with key or pull bolt.
Deadbolt operated from external side with key and from internal side with key or knob.

RANGE:

- Locks with 1 latching point (lateral)
- Locks with 3 latching points (three-point)
- Locks with 5 latching points (five-point)
- Locks with deadbolt only (5 pistons) or with latch and deadbolt (4 pistons + one latch at bottom)
- Locks with internal side key or internal side knob

STANDARDS:

Latch and deadbolt model with 3 latching points, with A2P* certification (1 star)

Latch and deadbolt model with 5 latching points, with A2P* certification (1 star)
